CAPITAL
GARDEN PRODUCTS

For over twenty five years our skilled designers and craftsmen have produced decorative fibreglass plant containers that even the keenest eye cannot distinguish from the original materials.

Why fibreglass and resin?

A wonderfully tough and versatile material, fibreglass is maintenance-free and light in weight. Completely frost-proof and non-corrosive, it is superior to terracotta, stone and even some metals and is ideal for use inside and out.

Authentic finishes

Weathered bronze, terracotta, lead, aluminium, stone and even rust. Our finishes are so authentic, and long lasting, that we have had planters in some of the world's most prestigious homes, gardens, hotels and public buildings for well over a quarter of a century.

The art of deception

All our original designs are made in the final finish there is no painting or coating put on after the event so it cannot chip or flake off over time. The technique allows the rustic finishes to age over time and the pure colours to retain their lustre for years to come. A **Capital Garden Products** planter is near impossible to tell from its counterpart until you try to lift it!

The real thing

We can also make planters in most materials such as steel, zinc or timber. Please contact us for details.

Working to a brief / custom sizes or bespoke design

From your plans or drawings we can reproduce any design in any size or quantity, from one to one thousand and more. Alternatively, we can aid you at the design stage, so you can achieve the results you desire. These bespoke projects now represent a quarter of our work.

Get in touch

Customers' queries are always welcome and dealt with as quickly as possible. Our website has news of new developments, permanent showrooms and forthcoming exhibitions around the world.
